

How do they test for
Corona Virus?

These are some symptoms of a Corona virus:

A cough

Shortness of breath

A fever

If you experience these symptoms, the doctor may want to see you.

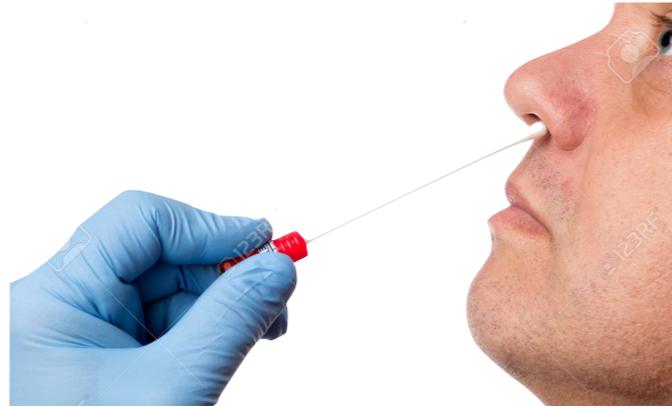

The Doctor may need to test
you for Corona Virus.

The doctor will use a swab to take a sample from your mouth and nose.

The doctor will put the swab in
your mouth.

The doctor will put the swab up
your nose.

The doctor will take the swabs
to be tested.

You may have to wait for your
test results.

The doctor will explain your
test results.

Your staff will support you with
all of this.
