

What is a Pandemic?

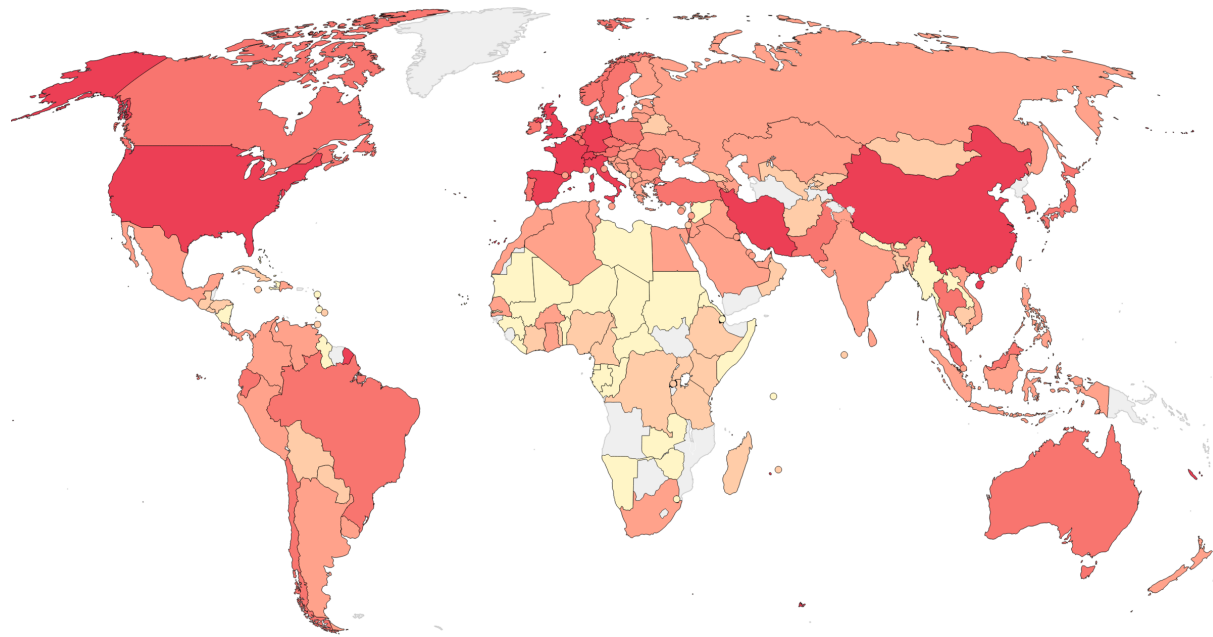

A Pandemic is an illness
that affects lots of people.

A Pandemic is an illness that spreads all over the World.

We are experiencing a Pandemic at the moment.

The Corona Virus has spread to many countries.

The Corona Virus is making lots of people very poorly.

Many Doctors are trying to find a treatment for Corona Virus.

When Doctors have found a treatment, Corona virus will become manageable.

When the virus is manageable,
the pandemic will finish.
