

How to grow onions

Preparing the ground

Preparing the ground

Before planting your onions
make sure the ground is well
prepared and raked.

Sowing

Using your guide line draw a line from one end of the plot to the other.

Use a ruler to measure the distance between the onion bulbs.

Onion bulbs should be placed
4 inches apart.

Onions should be placed
out like this.

Use a stick to create a small hole in the soil.

Put your onion bulb in the hole you have created.

Cover with soil.

Now water the onion bulbs.

Water the onions when the soil
is dry.

Your onions are ready when the
stems turn yellow and topple.
