

# Meet Danielle

## Home Manager Supported Living in Gayton, Norfolk

### About Danielle

Danielle has been with Achieve together for over 15 years. She first joined while at college, completing her work placement at an Achieve Together home. She quickly developed a passion for the role and everything it involved, which led her to become a Support Worker. She spent five years here developing her skills, which she thoroughly enjoyed, before moving to another Achieve together home to take on a new challenge as a Senior Support Worker. Within two years, she progressed further and stepped into the Home Manager role where she is today.

### Danielle's key skills

Danielle is passionate about empowering the people we support by building their skills and confidence, promoting their independence, and enabling them to go out and about in the local area. She takes pride in supporting individuals to engage in voluntary work and helping them progress further towards paid employment.

### Danielle's successes

An individual that Danielle previously supported, moved into our home at 18 years old, presenting with behaviours that challenge and requiring 14 hours of 2:1 support each day. Through consistent, person-centred support, Danielle helped them develop essential daily living skills and build independence. As a result, he was then able to successfully transition into his own flat with a significantly reduced care package.

"I love supporting individuals to engage with voluntary work and find paid employment".

"My proudest achievement was helping a person we supported to develop living skills and move out into their own flat".
